

Consider This

when choosing your wedding cake

- Details of your wedding, such as theme, time of day, season and indoor or outdoor wedding
- Customized colors for borders and flowers
- Selection of icings, frostings, and layer flavors available
- Wedding ornaments
- Serving accessories
- Groom's Cake

freezing the top tier of the cake

- Remove any sugar flowers and set them aside.
- Wrap the cake in several layers of plastic wrap (DO NOT USE TIN FOIL).
- Seal the wrapped cake in an airtight bag and store in the coldest part of the freezer.

when planning your reception

- Based on a serving size of 1" x 2", three tiers will serve 50 to 100 guests. You may need five layers for 200 guests or more. Sheet cakes may also be used for additional servings.
- Your cake table should include: two plates, two forks, two napkins, a glass of warm water, an extra towel to wipe off the knife and a plate or tray for the decorations as they are removed from the cake.
- Make wedding photographs memorable by adding special touches to your cake table with rose petals, candles, tea lights, fruits, family photographs, special items from the parents' or grandparents' wedding, your toasting glasses or floral arrangements from the bridal party. Dress up the table with elegant fabrics such as organza, tulle, print fabric or heirloom linen.

We also offer **custom** catering including party trays, **fruit** and **veggie** platters, gourmet **desserts** and more. Don't forget the fresh **flowers**. We offer a wide array of bouquets and **centerpieces** for your special day.
